## PROJECTS

---

### WeatherRadar

<https://github.com/Mahikagarg09/Weather-Search>

- Developed a real-time weather website using React JS and a weather API fetched from openweathermap.org
- Implemented search functionality for users to view current weather information for a specific location.

### KwikFood

<https://github.com/Mahikagarg09/KwikFood>

- An online canteen portal accessible from any device with an internet connection and has a user-friendly and easy to navigate interface.
- A web-based platform built using ReactJS for the front-end and PostgreSQL and GraphQL APIs provided by Nhost to facilitate the development process.

### SociaAid

<https://github.com/Mahikagarg09/SociaAid>

- Provides a range of features to help individuals with social anxiety, shyness, and lack of confidence build the skills and confidence they need to lead fulfilling lives.
- Developed a real-time chat bot using ReactJS and API fetched from OpenAI and Webspeech API while using Nhost for backend.

## PROFESSIONAL EXPERIENCE

---

### Software Developer Intern

Zaridhar

- Contributed to the development of an e-commerce website for a major retail company, by adding new functionalities such as add-to-cart and add-to-wishlist functionality.
- Assisted in the development of a theme changing feature, allowing users to customize the look and feel of the website to their preference.
- Utilized technologies such as HTML, CSS, JavaScript, and React.js to complete assigned tasks.
- Demonstrated strong problem-solving skills in identifying and resolving bugs and issues that arose during the development process.
